# Functions

## Supported Both Simple and Complex Scenarios

The IB9365-LPR Series camera can work as an embedded access control application based on LPR software. It can trigger digital output device on this camera when a number plate is recognized and matched the data in list such as white list. This IB9365-LPR Series camera can convert number plates into Wiegand signals to work with the independent access control system.

### Simple Scenario

### Complex Scenario

## Built-in White List, Blacklist, All plates and Not In List For Number Plate Verification

Users can manage license plate lists for various purposes, such as a white list that triggers a welcome message, a black list that triggers an alarm, and an all plates list for access control management. Multiple lists are supported, with no limit on the number of supported license plates.

## Functions

### Stop & Go Outdoor Parking Solution

The IB9365-LPR Series adopts VIVOTEK's SNV II (Supreme Night Visibility II), and WDR Pro II. With a 12-40mm focal length lens, this advanced camera is ideally suited for vehicle detection in outdoor scenarios in which surveillance over longer distances or in low-light conditions is necessary, such as parking areas or gas stations.

The Smart IR II technology in IB9365-LPR makes nighttime image quality both brighter and clearer. The White LED design in IB9365-LPR-W even enables the reading of color license plates at night without optional illuminators.

### Easily Integrated with 3rd Party Systems Through Embedded LPR Software

This IB9365-LPR Series camera can export all license plate recognition results or read on its list management. The open architecture of the device ensures that it can be easily integrated with 3rd party systems, such as parking management systems, toll collection systems or weighbridge management systems, by sending XML or JSON messages.
